

Let there be light

with solar power

If there is no electricity nearby, there can be a problem.

Especially if you need light for safety or security. Now there is a solution. And it is an eco friendly solution.

The Briner solar-power system. It's a versatile, stand-alone lighting solution that is cost effective.

The rays of the sun are used for outdoor lighting wherever you need it.

The LED luminaire is a compact, energy efficient outdoor light that provides bright, clear illumination wherever you want it. Saves up to 80kg of CO2 emissions per month (1600 Black Balloons). Operates when needed, No timers. Light will turn on when it gets dark and remains on for up to 5 hours in Winter.

Four high-intensity light emitting diodes provide a focused output that minimises spill-over.

As shown here, it's ideal for almost all types of lighting. \$165. inc GST
